

Kiss of death model (bullish)

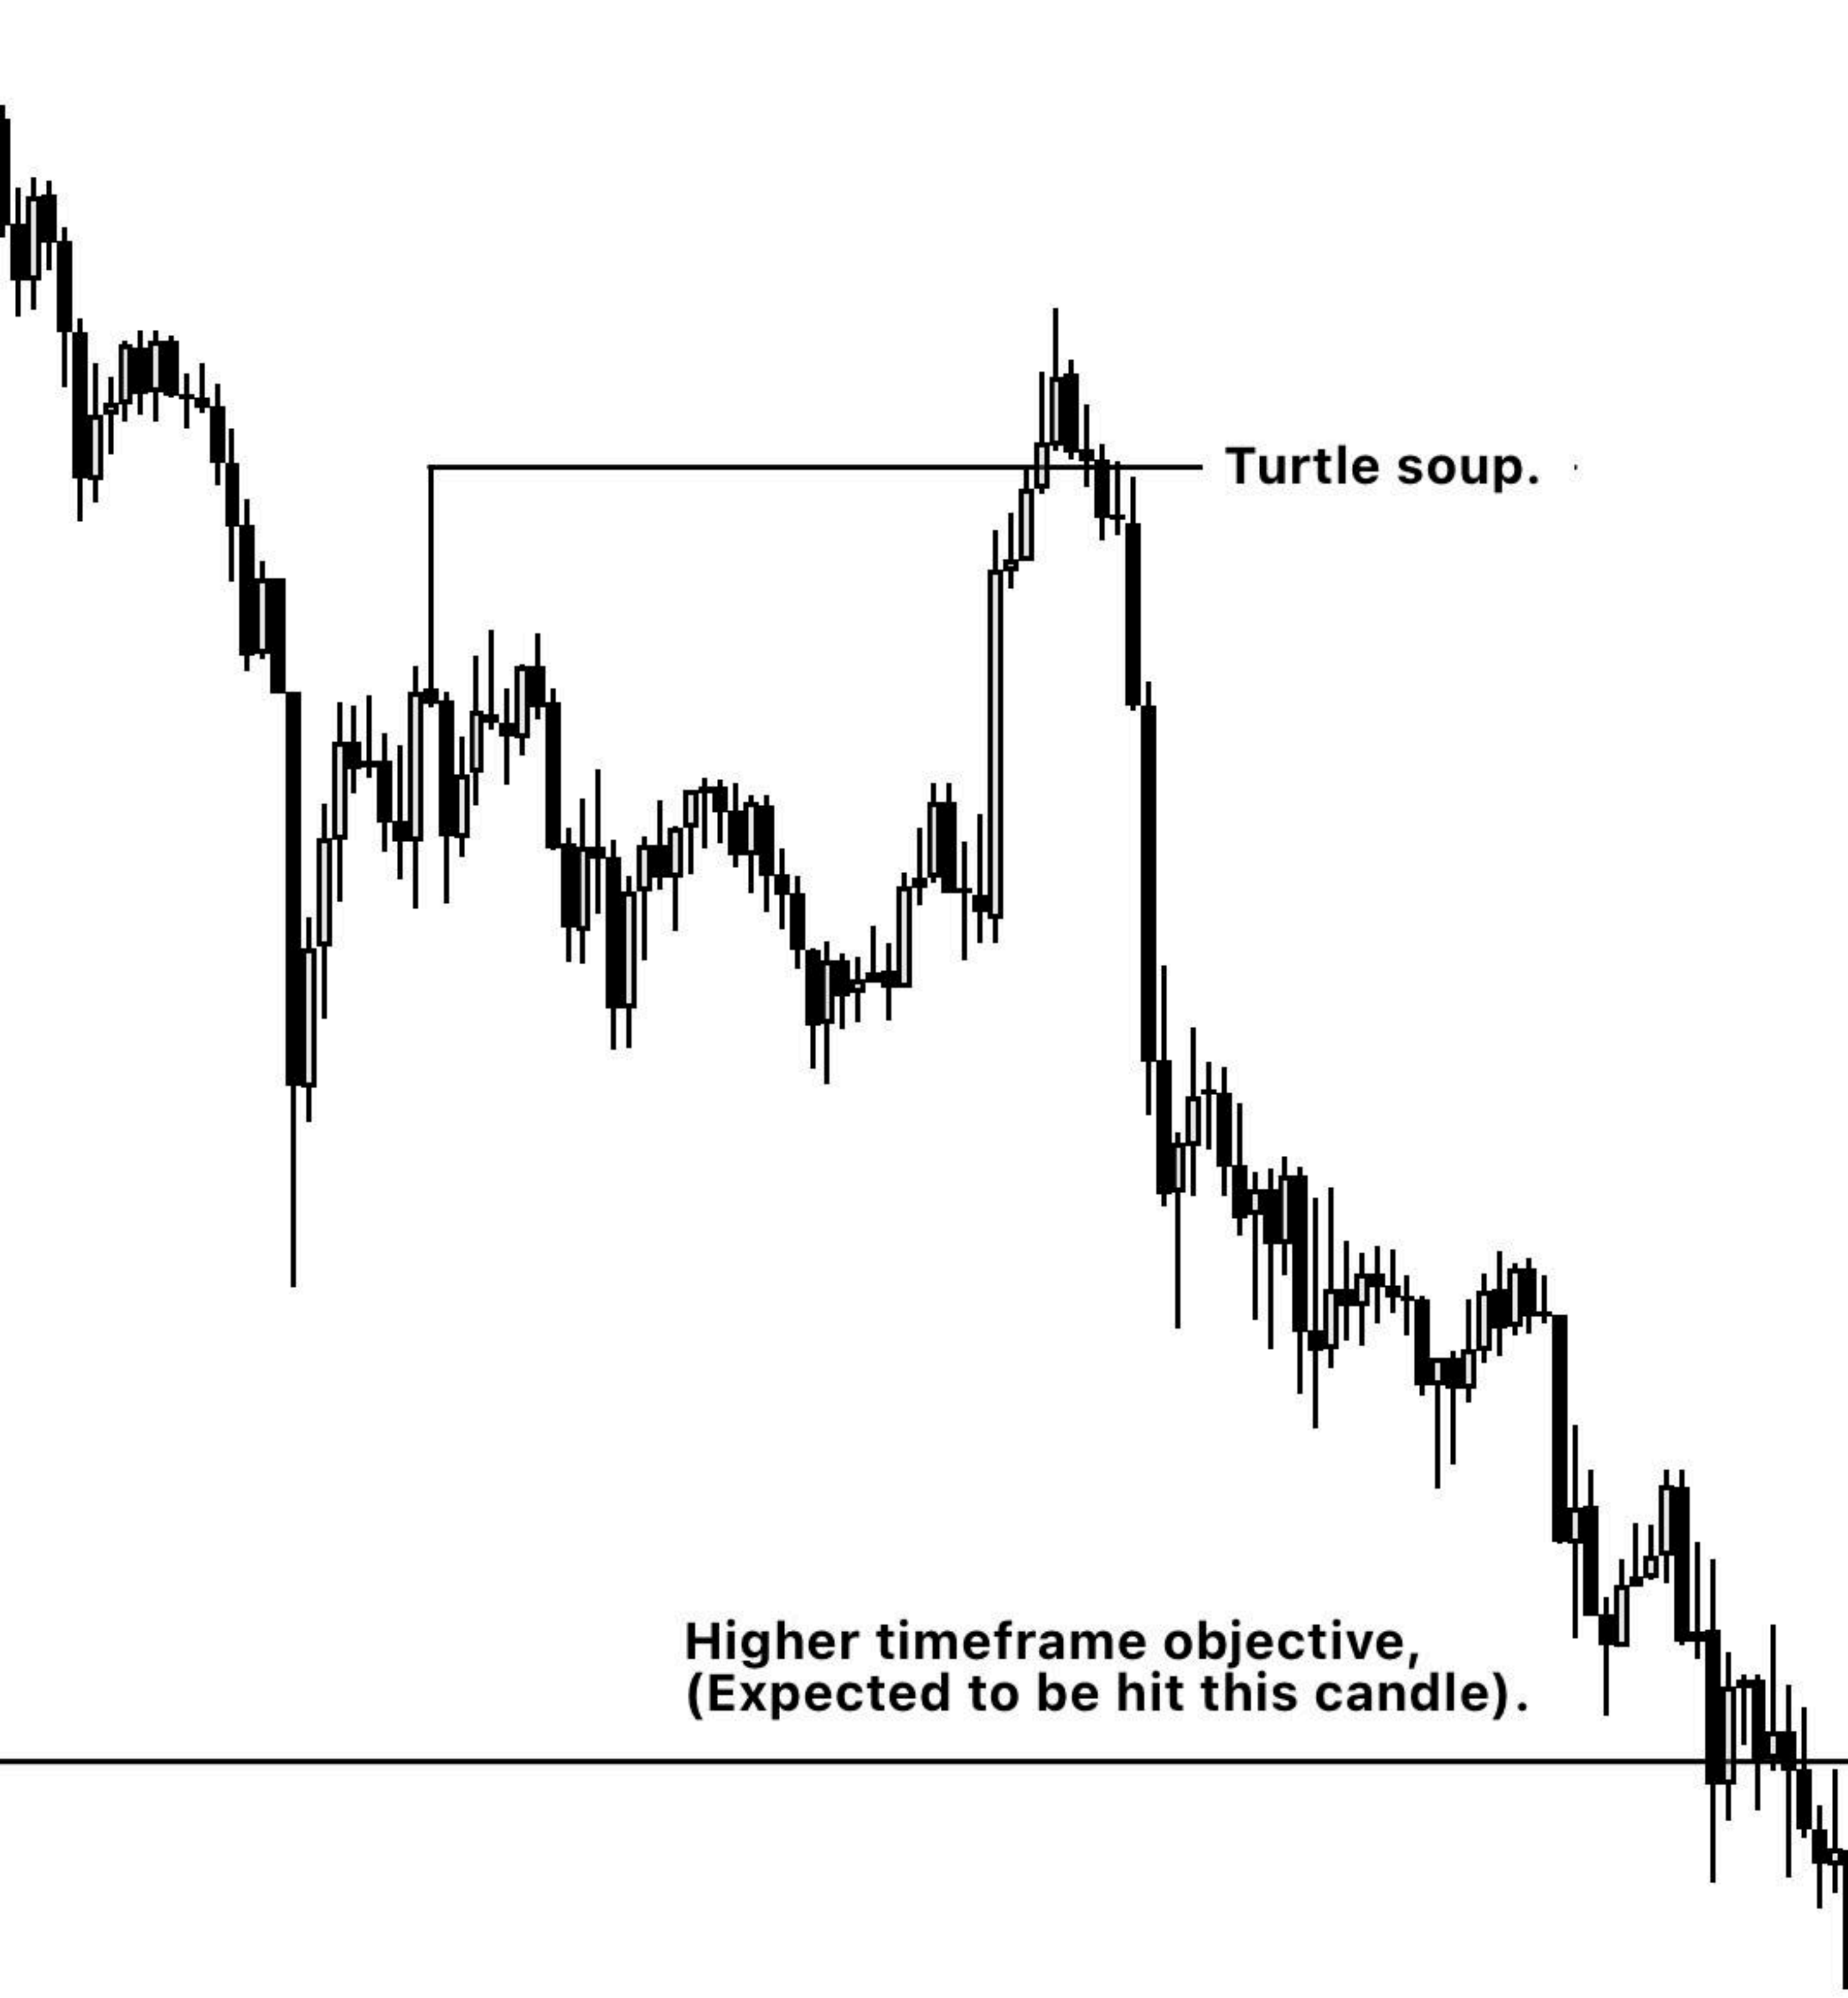

Kiss of death model (bearish)

HTF candle draw on liquidity.

Fake head and shoulders pattern.

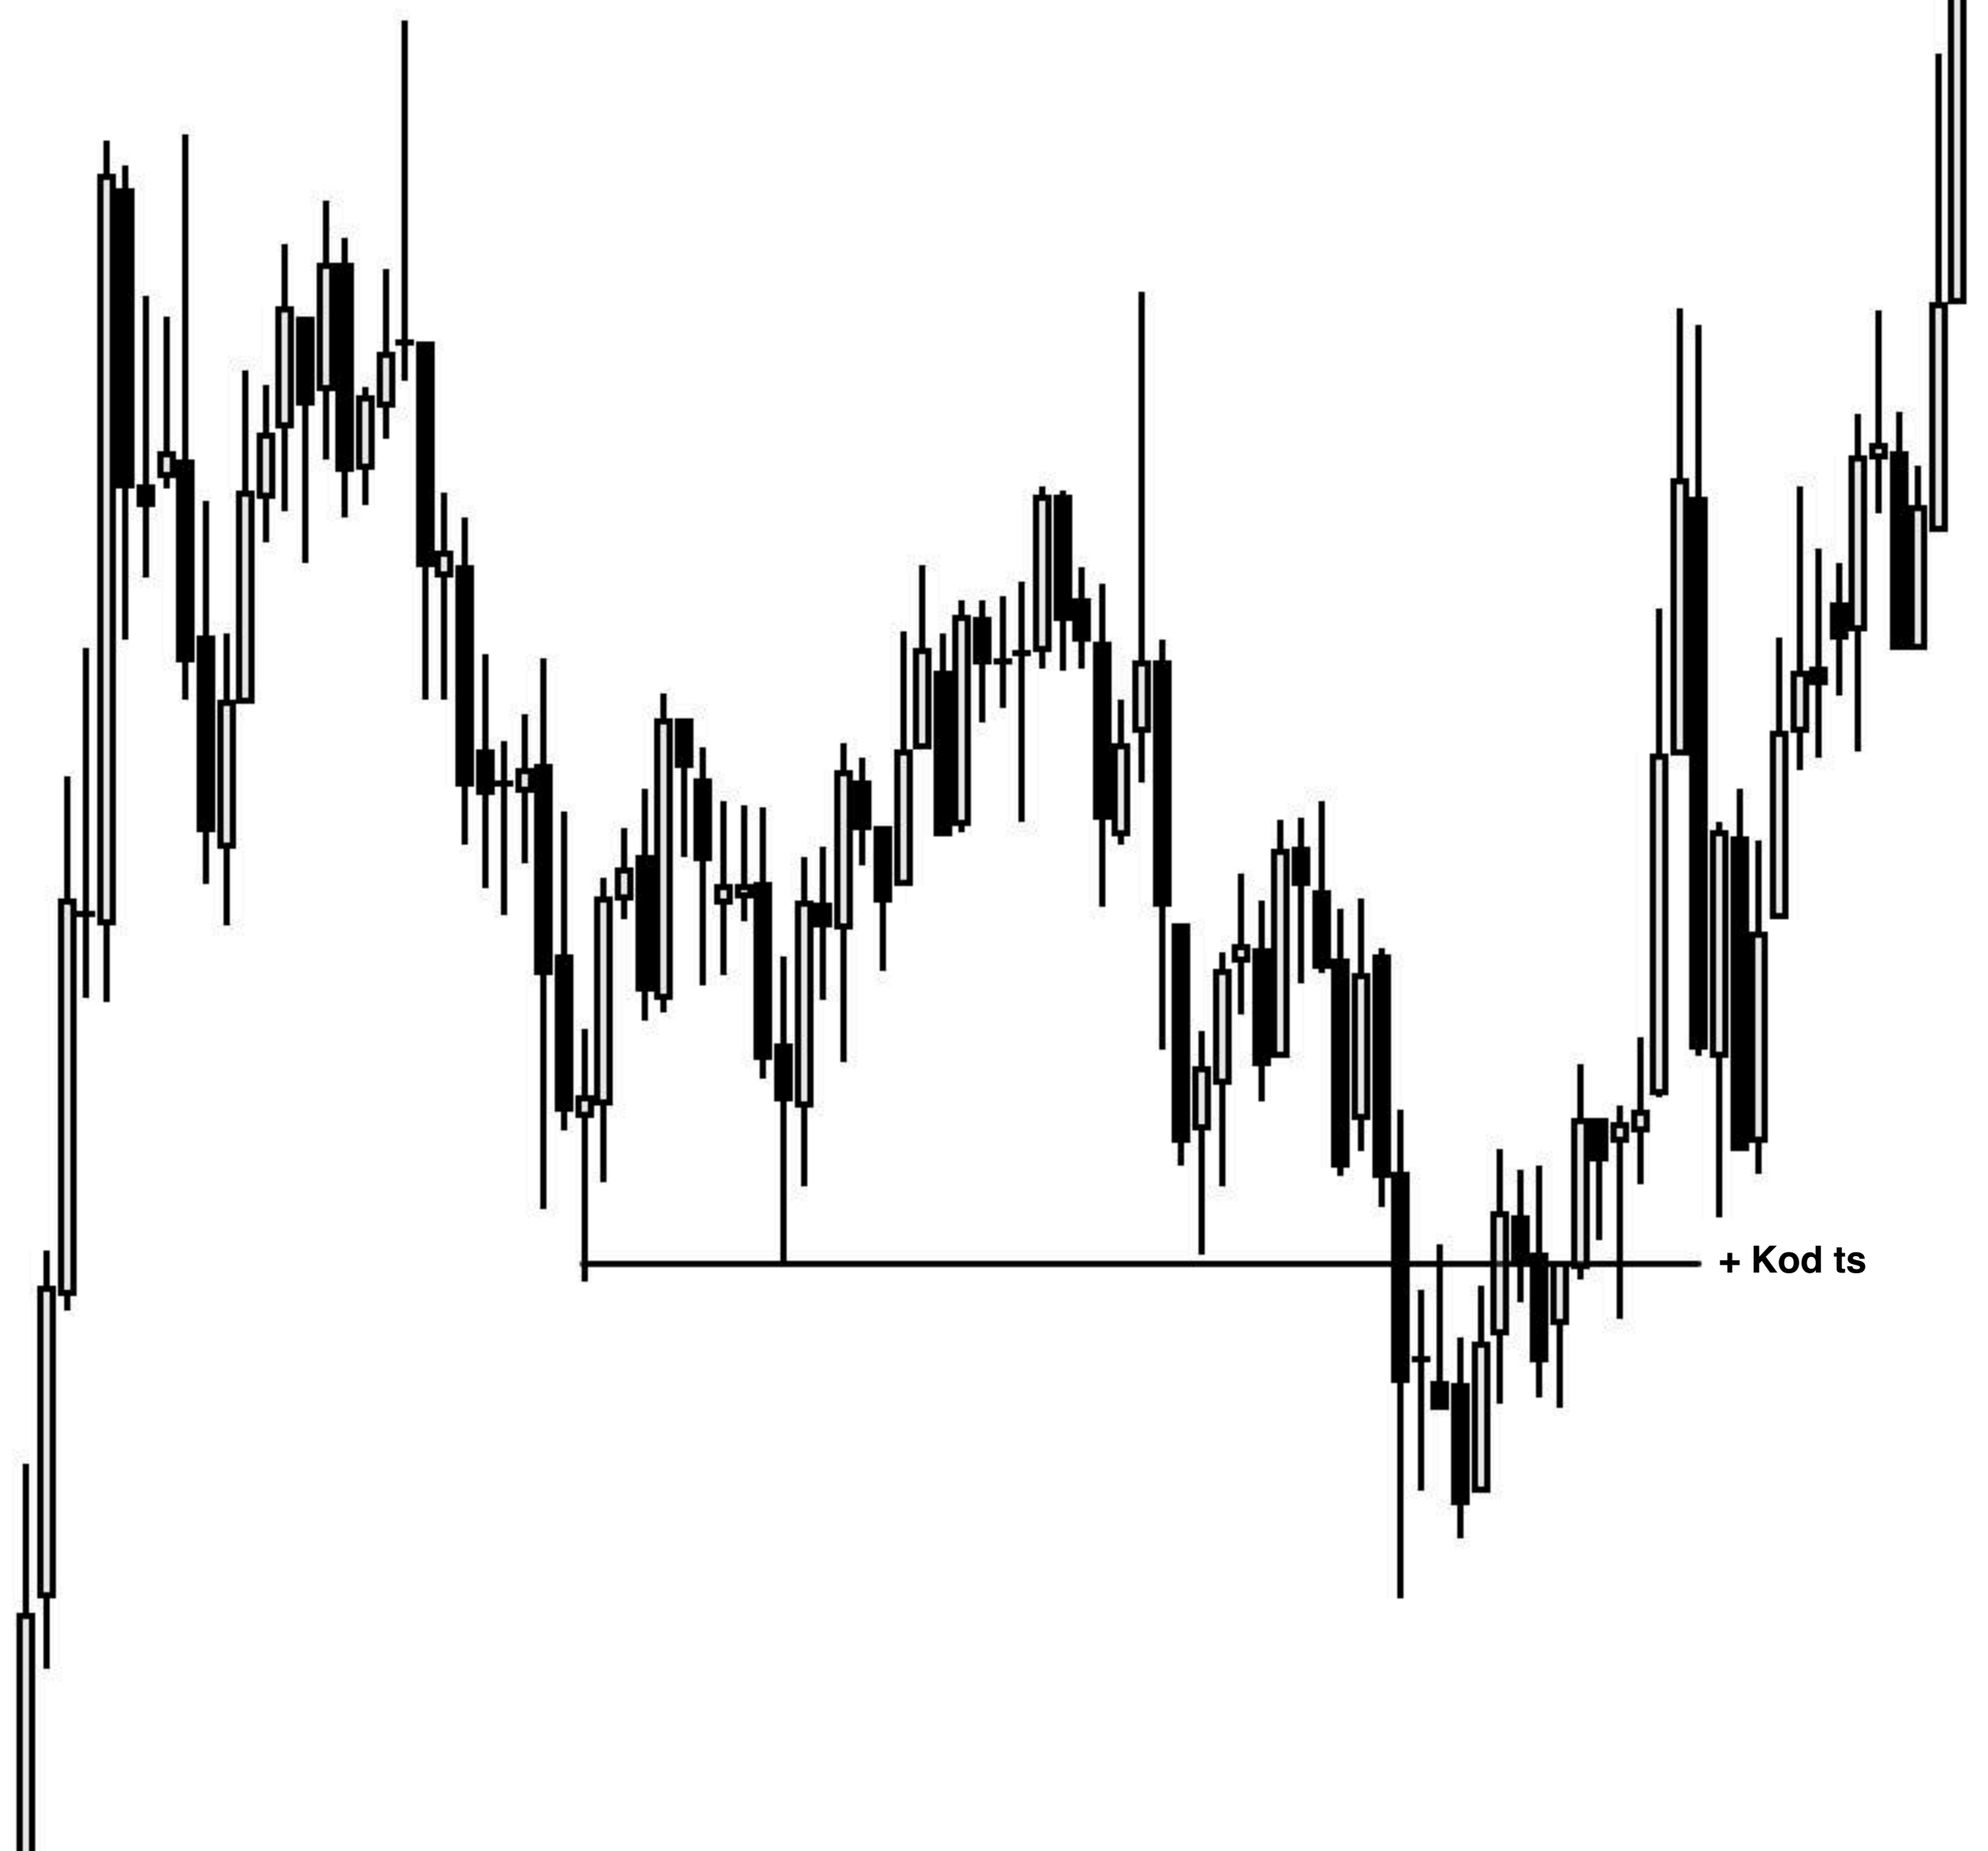

Turtle soup.

**Higher timeframe objective,
(Expected to be hit this candle).**

HTF objective.
(Expecting to be hit today)

Kiss of death model nuances:

- **Main components:**

- 1- HTF draw on liquidity almost reached (clearly bullish/bearish OF)
- 2- lower timeframe liquidity pool.
- 3- Market and candle profile.

- **Secondary components:**

- 1- Accumulation - manipulation (kiss of death) Distribution
- 2- Premium/Discount.
- 3- Probing orderflow.
- 4- SMT
(SMT = creation of equal highs and lows to be raided in the future).
